Specifiche prodotto :

Tutti i volumi **Play** sono realizzati in multistrato di betulla da 18 mm assemblati con colla vinilica D4 resistente all'acqua. Per fissare il volume in parete ed evitare di danneggiare la struttura ogni alloggiamento per le viti è rinforzato con bussole in ferro zincato.

Il grip di rivestimento è costituito da strati di vernice poliuretanica bicomponente e quarzo a granulometria fine. Un ulteriore strato riveste completamente la superficie di appoggio che andrà a contatto con la parete.

In questo modo garantiamo un'elevata resistenza nel tempo ed una superficie inalterata anche dopo numerosi lavaggi.

E' possibile inoltre richiedere superfici prive di ragnetti e personalizzazioni di forme e colori.

Rivestimento e colore :

Tutti i volumi possono essere sia rivestiti completamente (**Infinity grip**) o nella versione **Dual texture**, la variazione di prezzo é rispettivamente indicata nel catalogo dai colori azzurro e verde

Ogni volume può essere prodotto con tre rivestimenti : **Dual Texture** / **Dual Texture COLOR** (prezzo in verde es: € 100)
Infinty Grip (prezzo in azzurro es: € 100)

Infinty grip (INF)

Riveste integralmente il volume.

Dual Texture (DT)

Rivestimento combinato di legno (chiaro o scuro) con finitura trasparente e **Infinity grip**.

Dual Texture COLOR (DTC)

Rivestimento combinato di superficie lucida e **Infinity grip** monocolore.

Oltre alla gamma dei 10 colori disponibili è possibile richiedere colori personalizzati.

Installazione :

Viti a legno diametro 4 mm lunghezza da 5 a 7 cm.

IMPORTANTE : utilizzare tutti i fori di fissaggio.

Manutenzione :

La superficie è lavabile a mano o con idropulitrice.

Evitare prodotti corrosivi come acidi e spazzole metalliche.
